

(Revised) May 30, 2023

Dear Incoming 3rd Grade Parents,

Happy Summer to everyone! The 3rd grade teachers wanted to update you on the suggested summer work for your child. We hope that this summer work will be a helpful review and assist in preparing your child for 3rd grade over the summer.

For math, your child should complete the Cumulative/Benchmark Assessments, which includes 2 packets. Students are also encouraged to login to Reflex Math to continue practicing their addition and subtraction facts. Reflex Math is a paid benefit that is typically not offered to students during the summer. This is a great resource to help hone your child's math skills.

The summer reading book will be *The Chocolate Touch*. Along with reading the book, students will answer questions for each chapter. We highly suggest partitioning the reading throughout the summer to allow time to complete the reading packet.

We strongly believe that continued work during the summer assists all students in retaining information and helps better prepare them for their next level of learning. Thank you for your support and we look forward to seeing your student in August!

Sincerely,

Jessica Koller and Madison Busch  
3rd Grade Teachers
