

May 29, 2023

Dear Incoming 4th and 5th grade Parents,

Happy Summer to everyone. The intermediate math team wanted to update you on the required summer math work for your children. For this coming summer there will be 1 required activity.

Your child will complete the readiness test posted on the school website as summer work. This should be work that students can complete independently. It helps us assess their retention of math skills over the summer. This work will be collected the first week of school.

Thank you for your support with the required summer work for math. We look forward to seeing your student in August!

Sincerely,  
Kim Crable and Gina Kolibab  
The Intermediate Math Team
